

WEST LINN - WILSONVILLE SCHOOL DISTRICT

Water Quality Information

August 29, 2016

Dear Trillium Creek Families,

This letter is being sent to update you about the water quality testing results that were shared on August 11. The initial results from July testing at Trillium Creek Primary School showed that out of 105 test locations, one indicated elevated levels of lead that exceeded the action level of 20 parts per billion. The elevated level was detected in a bubbler in a classroom.

Immediate remediation steps were taken include turning water off at these locations, replacing subject fixtures, and retesting. After remediation, water was retested on August 15. The fixture tested below the action level of 20 ppb. These results have cleared all fixtures at Trillium Creek Primary School for elevated levels of lead or copper.

More information about District water quality testing is available at <http://www.wlwg.k12.or.us/Page/10603> .
